

Deluxe Sight Glass for Bottlers

This Sight Glass is designed to display the syrup level within your Smoky Lake Bottler. This is especially handy if you do your Filtering and Bottling processes simultaneously. Now, you'll always know exactly how full the bottler is without needing to remove the lid, reducing the risk of an overflow.

Another benefit of this Sight Glass is that it extends your Tomlinson Valve away from the body of your Bottler. Many folks have reported that they enjoy having this extra space while bottling.

This Sight Glass is compatible both with Water Jacketed Bottlers and Steam Bottlers.

ALWAYS USE TEFLON TAPE ON THREADED CONNECTIONS!

This will enhance seal and adjustability. It will also prevent binding.
